# DF dual

Technical data

|                                 |    |          |
|---------------------------------|----|----------|
| Type                            | -  | DF2 dual |
| Accuracy class                  | %  | ≤±0.04   |
| Rated torque (Md <sub>n</sub> ) | Nm | 1,000    |

|   |    |  |
|---|----|--|
| Torque measuring system   |    |  |
| Technology  | -  | Rotating                                   |
| Rated torque (Md <sub>n</sub> ) #1  | Nm | 1,000                                      |
| Rated torque short measurement range (lower limit) (Md <sub>ns</sub> ) #2 | Nm | 200  |
| Accuracy class (Md <sub>ns</sub> )  | %  | ≤±0.04                                     |
| Accuracy class extended (for Md <sub>n</sub> )                            | %  | N/A  |
| Accuracy class extended (for Md <sub>ns</sub> )                           | %  | N/A  |
| Outputs   | -  | Frequency (RS422), Voltage, CAN bus, Alert |
| Test signal   | -  | see test report                            |

|                                    |    |       |
|------------------------------------|----|-------|
| Mechanical dimensions #3           |    |       |
| Outer diameter of rotor #4         | mm | 128   |
| Lengths (Rotor, without centering) | mm | 48    |
| Pitch circle diameter #5           | mm | 101.5 |

|  |     |                   |
|--|-----|-------------------|
| Speeds and speed measuring systems           |     |                   |
| Speed detection (integrated)                 | -   | without           |
| Speed detection (optional)                   | -   | inductive / magn. |
| Maximum Speed without speed detection system | rpm | 20,000            |
| Optional increased speed                     | rpm | 23,000            |
| Maximum speed with magnetic speed encoder    | rpm | 11,000            |
| Maximum speed with optical speed encoder     | rpm | N/A               |
| Maximum speed with inductive speed encoder   | rpm | 23,000            |

Technical data

| Type               | -  | DF2 dual |

| Balance quality-level (DIN ISO 1949)                        | -       | G2.5                                |
| Inertia of rotor  | kgm²    | N/A                                 |
| Max. limits for relative shaft vibration (peak to peak) #11 | µm      | $S_{(p-p)} = \frac{9000}{\sqrt{n}}$ |

## Technical data

| Type                            | -  | DF2 dual |
|---------------------------------|----|----------|
| Accuracy class                  | %  | ≤±0.04   |
| Rated torque (M <sub>dN</sub> ) | Nm | 1,000    |

### Weight approx.

|           |    |     |
|-----------|----|-----|
| Rotor #12 | kg | 1.6 |
|-----------|----|-----|

### Mounting distances (without optional speed detection system)

|  |    |       |
|--|----|-------|
| Nominal radial displacement (rotor - stator) | mm | 149.5 |
|--|----|-------|

|   |    |           |
|---|----|-----------|
| Tolerance to nominal radial displacement (rotor - stator) | mm | +0.2/-0.2 |
|---|----|-----------|

|  |    |     |
|--|----|-----|
| Nominal axial displacement (rotor - stator) #7 | mm | 7.0 |
|--|----|-----|

|  |    |       |
|--|----|-------|
| Tolerance to nominal axial displacement (rotor - stator) | mm | ≤±0.5 |
|--|----|-------|

### Flatness and concentricity tolerances rotor

|                                      |    |      |
|--------------------------------------|----|------|
| Circular run-out-axial tolerance #13 | mm | 0.01 |
|--------------------------------------|----|------|

|                                       |    |      |
|---------------------------------------|----|------|
| Circular run-out-radial tolerance #13 | mm | 0.01 |
|---------------------------------------|----|------|

### Power supply

|                |   |         |
|----------------|---|---------|
| Nominal supply | V | (DC) 24 |
|----------------|---|---------|

|                  |   |              |
|------------------|---|--------------|
| Supply range #14 | V | (DC) 23...25 |
|------------------|---|--------------|

|  |   |    |
|--|---|----|
| Max. current consumption in measuring mode | A | <1 |
|--|---|----|

|   |   |    |
|---|---|----|
| Max. current consumption in start-up mode | A | <2 |
|---|---|----|

|                           |   |     |
|---------------------------|---|-----|
| Nominal power consumption | W | <24 |
|---------------------------|---|-----|

### Load resistance

|                  |   |       |
|------------------|---|-------|
| Frequency output | - | RS422 |
|------------------|---|-------|

|                |      |     |
|----------------|------|-----|
| Voltage output | kOhm | ≥50 |
|----------------|------|-----|

### Dynamic

|                  |     |    |
|------------------|-----|----|
| Frequency output | kHz | ≤6 |
|------------------|-----|----|

|                |     |    |
|----------------|-----|----|
| Voltage output | kHz | ≤6 |
|----------------|-----|----|

Remarks and information

| Link no. | Topic                      | Remark   |
|----------|----------------------------|--|
| #1       | Nominal torque             | Based on customer requests, the measurement systems can optionally be optimized for not listed nominal torque values (intermediate ranges possible).   |
| #2       | Second torque range        | The written second nominal torque value ( $M_{d_{ns}}$ ) is the smallest possible. Greater second torque ranges can be chosen on demand.   |
| #3       | Dimensions                 | Mechanical dimensions are without engagement. Use the drawings and step files as master for your constructions.  |
| #4       | Details in the drawings    | Value can vary by optional components. Please find details to this attribute in the integrated drawings.   |
| #5       | Pitch circle diameter      | The pitch circle diameter is identically at input and output side for most systems. More information is given in the drawings of a product.  |
| #6       | Linearity                  | Values of Linearity deviation incl. Hysteresis can only be reached if positive and negative sensitivity values are used.   |
| #7       | Reference planes           | Please check the drawings for information about the reference planes of this attribute.  |
| #8       | Temperature range (rotor)  | No condensation allowed.   |
| #9       | Temperature range (stator) | No condensation allowed. Temperature related to housing ground point.  |
| #10      | Load limits                | The given values are only valid if no other load occurs at the same time. If the loads in sum are 100%, the max. error will be 0.3% of the nominal torque. Limit and break torque are lower if other loads are applied (such as lateral forces). |

Remarks and information

| Link no. | Topic                                 | Remark  |
|----------|---------------------------------------|---|
| #11      | Vibration limits                      | Vibration limits are not an influence to the machine. They reflect the allowed effect onto the rotor (ISO 7919-3). Parameter "n" is given in "r/min." |
| #12      | Weights                               | Weights are related to components without options like speed detection system. Please contact us for exact weight information of options.             |
| #13      | Flatness and concentricity tolerances | The parameters of "Flatness and concentricity tolerances rotor" are manufacturing tolerances.   |
| #14      | Supply voltage                        | The supply voltage range must be given at measurement system side. Long wires can reduce the voltage level from power supply to measurement system.   |
