LIPS P133
Mid-Stroke contactless inductive linear position sensor

- Non-contacting inductive technology to eliminate wear
- Travel set to customer’s requirement
- Short body length
- High durability and reliability
- High accuracy and stability
- Sealing to IP65/IP67 as required

As a leading designer and manufacturer of linear, rotary, tilt and intrinsically safe position sensors, Positek® has the expertise to supply a sensor to suit a wide variety of applications.

Our P133 LIPS® (Linear Inductive Position Sensor) is an affordable, durable, accurate position sensor designed for a wide range of industrial applications. It is particularly suitable for OEMs seeking good sensor performance in situations where a short-bodied sensor is needed and cost is important. The unit is compact and space-efficient, being responsive along almost its entire length, and like all Positek® sensors provides a linear output proportional to travel. Each unit is supplied with the output calibrated to the travel required by the customer, from 51 to 100mm and with full EMC protection built in.

Overall performance, repeatability and stability are outstanding over a wide temperature range.

The sensor has a rugged stainless steel body and plunger. It is easy to install and set up, mounting options include flange and body clamps. The plunger can be supplied free or captive, with female M4 thread, or spring-loaded with a ball end. The P133 also offers a wide range of mechanical and electrical options, environmental sealing is to IP65 or IP67 depending on selected cable or connector options.

SPECIFICATION

**Dimensions**
- Body diameter: 35 mm
- Body Length: Dependant on calibrated travel & mounting option

**Calibrated Travel**
- Standard Flange mounted
  - 51 mm to 70 mm: 125 mm
  - 71 mm to 100 mm: 155 mm

**Plunger**
- Ø 6mm

For full mechanical details see drawing P133-11

**Power Supply**
- +5V dc nom. ± 0.5V, 10mA typ 20mA max

**Output Signal**
- 0.5-4.5V dc ratiometric, Load: 5kΩ min.

**Independent Linearity**
- ≤ ± 0.25% FSO @ 20°C
- ≤ ± 0.1% FSO @ 20°C available upon request.

**Temperature Coefficients**
- ≤ ± 0.01%/°C Gain &
- ≤ ± 0.01%/°C Offset

**Frequency Response**
- > 10 kHz (-3dB)
- > 300 Hz (-3dB) 2 wire 4 to 20 mA

**Resolution**
- Infinite

**Noise**
- < 0.02% FSO

**Environmental Temperature Limits**
- Operating: -40°C to +125°C standard
- -20°C to +85°C buffered
- Storage: -40°C to +125°C

**Sealing**
- IP65/IP67 depending on connector / cable option

**EMC Performance**
- EN 61000-6-2, EN 61000-6-3
- Vibration: IEC 68-2-6: 10 g
- Shock: IEC 68-2-29: 40 g
- MTBF: 350,000 hrs 40°C Gf

**Drawing List**
- P133-11 Sensor Outline

Drawings, in AutoCAD® dwg or def format, available on request.

Do you need a position sensor made to order to suit a particular installation requirement or specification? We’ll be happy to modify any of our designs to suit your needs - please contact us with your requirements.
How Positek’s PIPS® technology eliminates wear for longer life

Positek’s PIPS® technology (Positek Inductive Position Sensor) is a major advance in displacement sensor design. PIPS®-based displacement transducers have the simplicity of a potentiometer with the life of an LVDT/RVDT.

PIPS® technology combines the best in fundamental inductive principles with advanced micro-electronic integrated circuit technology. A PIPS® sensor, based on simple inductive coils using Positek’s ASIC control technology, directly measures absolute position giving a DC analogue output signal. Because there is no contact between moving electrical components, reliability is high and wear is eliminated for an exceptionally long life.

PIPS® overcomes the drawbacks of LVDT technology – bulky coils, poor length-to-stroke ratio and the need for special magnetic materials. It requires no separate signal conditioning.

Our LIPS® range are linear sensors, while RIPS® are rotary units and TIPS® are for detecting tilt position. Ask us for a full technical explanation of PIPS® technology.

We also offer a range of ATEX-qualified intrinsically-safe sensors.

TABLE OF OPTIONS

| CALIBRATED TRAVEL: | Factory set to any length from 0-51mm to 0-100mm (e.g. 76mm). |

| ELECTRICAL INTERFACE OPTIONS |

Supply Current 10mA typical, 20mA maximum.

4-20mA (2 wire) | +24 V dc nom. + 18-28V. | 300Ω @ 24V. |
| (3 wire sink) | +24 V dc nom. + 13-28V. | 950Ω @ 24V. |
| (3 wire source) | +24 V dc nom. + 13-28V. | 300Ω max. |

Sensors supplied with access to output ‘zero’ and ‘span’ calibration adjustments as standard. No access option available.

CONNECTOR/CABLE OPTIONS

Connector - Hirschmann GD series | IP65 |
Cable with M12 gland or short gland | IP67 |
Cable length >50 cm – please specify length in cm

MOUNTING OPTIONS

Flange, Body Tube Clamp.

PUSH ROD OPTIONS – standard retained with M4x0.7 female thread
Sprung loaded (spring supplied loose), Dome end (sprung loaded) or Free.
