

## GSV-5

### Highlights

- Miniature measuring amplifier with 6-wire technology
- High frequency range from 250 Hz to 10 kHz
- The new modell instead of old GSV-1L
- Tarier function via control line
- purely analog measuring distance for the best possible signal-to-noise ratio
- Improved long-term stability and temperature drift by avoiding mechanical balancing components
- Noise Amplitude <150 nV/V Pk-Pk bei 10 Hz Bandwidth
- Noise Amplitude < 1  $\mu$ V/V Pk-Pk bei 2.5kHz Bandwidth

### Description

The miniature measuring amplifier GSV-5 measures only 23mm x 20mm x 6mm and can therefore be perfectly integrated into sensors. Solder pads are provided for wiring, it can be easily integrated into larger pcbs with optionally available pin strips.

Due to a high cut-off frequency up to 10 kHz, it is suitable for detecting static and dynamic signals from sensors with strain gauges. The purely analog measuring distance guarantees the best possible signal-to-noise ratio.

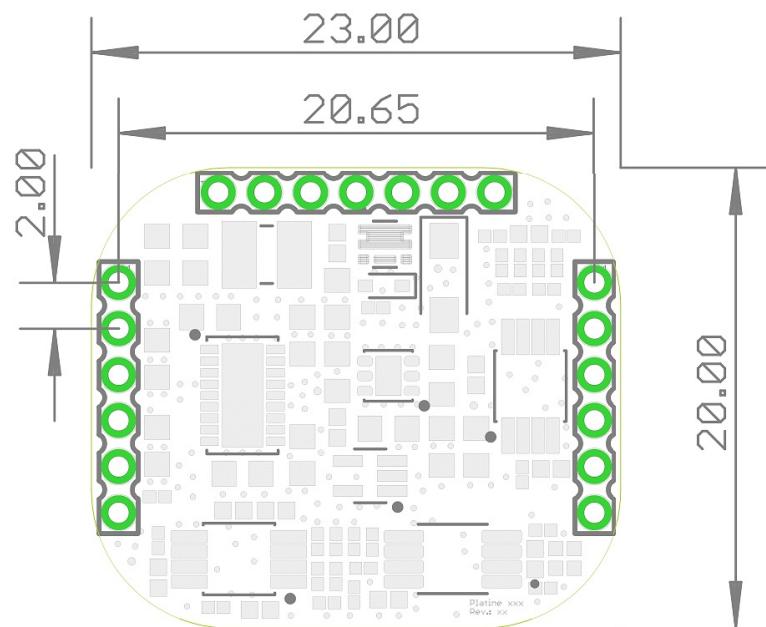

Variants with voltage output -10V to +10V and -5V to +5V are available. These are suitable for tensile-compressive measurement or for measuring torque turning right and left.

The input sensitivity in the standard version of GSV-5 is 2 mV/V. Other input sensitivity levels (0.5mV/V, 1mV/V, 2mV/V and 4mV/V) are factory-adjustable on request.

The automatic zero setting function stores the setting in non-volatile memory even in case of voltage underrating.

In addition, we offer calibration of measuring electronics and system calibration in conjunction with a sensor.

Mounting

for Pin configuration

X 1		X 2	
1	VDD: Power supply 12-24V	1	UF+: positive sensor line
2	GND : Mass	2	US+: positive bridge supply
3	Tara: Zero balance to 5V output sp.	3	US-: negative bridge supply
4	F-UA: external sensor line TARA	4	UF-: negative sensor line
5	GND : Mass	5	UD+: positive bridge signal
6	Uout: Analog output	6	UD-: negative bridge signal

TARE range of +/- 100% input sensitivity.

A short (<2s) high level >3V (max. 24V) at the tare input sets the analog output to 0 or 5V, depending on the variant.
